

David: I hope the Charter Revision Committee will also examine the need for an increase of two- back to the original number of school committee members- 9. With such an increase of the work load caused by the virus, the State and Federal regulations before and after it seems to me the administration is having problems meeting deadlines and committees both special and sub have problems relating information to other committee members. Example the lease /purchase agreement on our fleet of vehicles . Our Superintendent has not yet reported on her attempts to determine how our GPS might merge or find ways to coordinate with other public area schools. It's been too long to report fully the seizure of one of our Hondas. She has asked for an assistant as well as curriculum assistants. She has so much on her plate and it seems to increase every time they have another meeting. No blame game here but a need to smooth the path to a more efficient SC. Thank you for your consideration. James
